RUNNING TEAM PROJECT

ABOUT US

Kreeze is a high-quality Italian sportswear brand providing a range of apparel for athletes across a variety of sports. This innovative brand uses advanced fabrics to provide superior functionality combined with stylish Italian design, comfort and cutting-edge technology. Clients also have the guarantee of a company specialized in the production of quality clothing since 1987. In this catalogue you will find a wide range of hi-tech, innovative products with the guarantee of Italian-made quality. All our garments can be customised to meet the many needs of both professional and amateur cyclists.

Now it's time to make a choice!

GENERAL INFORMATION

In order to receive an accurate estimate, please follow the below steps carefully:

- 1) Choose your product: see the following pages or see the TEAM PROJECT section on our Website www.kreeze.com.
- 2) Choose your Artwork: if your team already has graphics, Bicycle Line can reproduce them if you send us the Artwork in vector graphics format (EPS/AI). If your team does not have its own graphics you can choose from a vast range of eye-catching designs that we have made for you. In this part of the process you can also customise the colour scheme of your kit, print it and send it to us for production. All our printing technology is digital therefore there is no limit to the number of colours we can use. However fluorescent colours are not available.
- 3) Send the logos: provide the sponsor logos in vector graphics format (EPS/AI). If they are not in this kind of format we will redesign the logos and charge them based on the complexity of the job.
- 4) Minimum order: the minimum production quantities are 10 pieces per article. In case of orders with lower quantities, prices will rise accordingly.

Note:

During production the colours in the graphic draft can vary due to chemical process, materials, colour content, printing methods...

In order to adapt the design to pattern, we reserve the right to modify the graphic draft during production also after agreement.

FABRICS

Fabric selection is fundamental as design procedure of our garments. Most of the technical fabrics we use are Italian-made and offer their best during cycling performance.

	<p>SPEED CONCEPT Polyester multi-fibres fabric with micro-cells construction: perspiration is rapidly absorbed by the fabric and channelled to the exterior of the garment. Besides this particular structure allows a rapid air circulation and helps the body to dry quickly. The garments realised with this material are soft hand and have elastic property. The result: you feel good, cool and dry. Fabric with antibacterial treatment that suppresses the proliferation of skin bacteria and bad odours.</p>
	<p>SCM 48 Fabric made with polyester multi fibres with an open cell structure: body moisture is absorbed quickly and channelled out of the garment. Indeed this configuration allows airflow through the garment and in this way helps the body to stay dry. The result is a refreshing sensation even during the most strenuous activity. Fabric with antibacterial treatment that suppresses the proliferation of skin bacteria and bad odours.</p>
	<p>DUAL-T Dual-T is a ceramic thread microfiber which has an optimal mechanic elasticity and provides a high performance and protection against UV rays up to 50 SPF. Its structure is joined to an hydrofit process which helps the moisture transport, making it an excellent fabric to use in warm weather. Fabric with antibacterial treatment that suppresses the proliferation of skin bacteria and bad odours.</p>
	<p>THERMOX 200 Smooth brushed cotton effect polyester fabric that feels good against the skin and transports moisture away from your skin as soon as possible to keep you dry. Thermox 200 also offers soft touch for maximum comfort whenever you ride.</p>
	<p>T-ISOWARM Medium weight winter fabric used in garments that fit perfectly and have excellent breathability. Gauging on the inside insures excellent thermal insulation.</p>
	<p>MODULO 200 Nothing keeps you comfortable longer during rides than Modulo 200, elastic and printable fabric which wicks moisture away keeping the body dry and regulating temperature for better cycling performance.</p>
	<p>WAVE T1 This double opposite interlacing wrap fabric with balanced weight is characterized by features like robustness, compactness and durability. The greatest comfort and softness are combined with total UV protection (UVP 50+).</p>
	<p>POWER S Power Stretch fabric guarantees muscular support which reduces muscle vibration and fatigue, thus improving the athlete's performance. Comfort, freedom of movements and Power effect are the principles boasted by the Lycra Sport yarn. Excellent UV protection (UVP50+).</p>
	<p>MERYL Meryl Actisystem offers innovative, high performance and versatile latest generation fabrics. Light weight, with high protection and resistance, quick drying and comfortable to wear when playing sport.</p>
	<p>VUELTA High-tech bielastic fabric with Lycra that guarantees excellent softness and absolute comfort as well as high resistance to pilling and abrasion. Guarantees a perfect fit. Bacteriostatically treated.</p>
	<p>COLORADO Colorado is a polyamide fabric with a beautifully soft texture like a second skin, ideal for producing comfortable garments for leisure and sport. This figure-hugging bi-elastic fabric also provides effective sun protection (UPV 50+)</p>

FABRICS

	<p>DROP Highly breathable fabric which easily drives moisture and sweat away. This material also guarantees excellent protection against the wind and exceptional comfort.</p>
	<p>WINDTEX Is a soft and light membrane, water and wind resistant. It's also breathable and keeps optimal the temperature of the body. In this way sportsmen are not forced to use heavy clothes with an improved freedom movements.</p>
	<p>PORDOI The characteristic yarn of the Pordoi fabric is highly resistant. This innovative weave has been developed to answer to the specific needs of comfort, breathability, weather protection and durability, ideal for mountain biking.</p>
	<p>THERMO-STRETCH This fabric is incredibly breathable, durable and easy care; ideal under unfavourable weather conditions it keeps constant the body temperature and, with its particular structure, protects you from wind.</p>

COLOUR CHART FOR CUSTOM

PRINTABLE COLORS MAP

All our printing technology is digital therefore there is no limit to the number of colours we can use without increasing the prize (fluorescent colours are not available). Below here you will find a list with main colours available. You can also ask about other colours but we inform you production could be longer.

110 YELLOW	111 DARK YELLOW	112 LIGHT ORANGE	113 DARK ORANGE	114 DARK RED	115 LIGHT PINK	116 PINK	117 FUXIA
118 LIGHT PURPLE	119 PURPLE	120 DARK PURPLE	121 ACID GREEN	122 LIGHT GREEN	123 GREEN	124 AQUA GREEN	125 LIGHT BLUE
126 MEDIUM BLUE	127 BLUE	128 LIGHT GRAY	129 GRAY	130 MEDIUM GRAY	131 ANTHRACITE GRAY		

We stress as well that every fabric absorbs colour in a different way during the heat transfer stage so it could happen the same colour adopts lightly different tonalities.

Note: During production the colours in the graphic draft can vary due to chemical process, materials, colour content, printing methods...

FABRIC'S COLOUR CHART FOR TROUSERS

COLOURS MAP

Before choosing the colours for your new equipment, we suggest you to pay attention to the colour of summer and winter trousers because the fabric of the internal area has already colour.

This option favours better performance during use but it is necessary paying a special attention when choosing the colour of the jersey.

It is also important to take in account when matching the two main garments of your cycling kit that not all summer and winter colours are available in lycra fabric.

In the following table you will find the available colours for trousers internal area.

- FABRIC AVAILABLE IN COLOURS IN THE FOLLOWING CHART
- TEXTURE HIGHLIGHTS THE CUSTOMISABLE FABRIC

GARMENT CARE

Our garments have been made using high-quality Italian-made fabrics. Pay close attention to wear washing temperature which clearly indicated in the label.

- Wash garments separately from other clothes/accessories to prevent friction and/or colour migration
- Machine-wash is possible but always use a delicate cycle and lukewarm water (max. 30° C). Use a mild liquid detergent only and do not use softeners
- If hand washing: do not leave garments in water to soak. To remove excess water gently squeeze by hand.
- If you make use of washing machine do not spin and do not tumble dry
- After washing do not hang the garments in the direct sunlight. Dry garments flat or hanging.
- Do not iron.
- After each ride never store damp clothes in a non-ventilated environment (e.g. plastic bags, sport bags, suitcase, etc.).
- After each ride wash the garments immediately in order to avoid fabric deterioration caused by bacterial attacks.
- Massage oils and muscular-creams may damage the fabrics fibres.

SIZE

Man sizes

We have improved our table for fit thanks to an in-depth collaboration with both professional and amateur athletes so as to cope the preferences in each running category. In the list below you will find the correspondence between European measurements and Italians.

We remind you that the following list is a mere indication since each category is ruled by different requirements and preferences. For example, a RACE jersey will be tighter than a SPORTIVE jersey although if the size is the same for both of them. Therefore we suggest you to ask your confidential agent for any further information.

TAGLIE - SIZE		XS - 44	S - 46	M - 48	L - 50	XL - 52	XXL - 54	XXXL - 56
